

CollectMax™

Advanced Collections Software

MaxPlans Module

- MaxPlans are an extremely powerful tool that allows CollectMax™ users to automatically manage workflows via user defined tracks.
- MaxPlans consist of a series of user defined steps which control the progression of an account without user intervention. Steps can include conditions which trigger different events depending whether the outcome is 'True' or 'False'.
- Events such as evaluating a condition, generating a document, adding an action item, sending an email, changing a status, or a delay in activity can be performed via MaxPlans.
- With Maxplans, there is no need for an employee to review each file to move the account through the workflow process.
- MaxPlans require an annual support contract as well as CollectMax™ Version 8. MaxPlans include Conditional Documents and MaxConditions. For more information, contact JST Sales.

CollectMax™ from JST.
Simply the right choice for legal collections software.
