

CollectMax™

Advanced Collections Software

MTG Search Interface

The screenshot shows the MediaTechGuy Data Search Interface software. The window title is "MediaTechGuy Data Search Interface". It has a menu bar with "Download", "Upload", and "Log". Below the menu bar is a "Web Site" field with a "Go" button. The main area is divided into four search categories: "Active Military", "In-Active Military", "Deceased", and "Bankruptcy". Each category has a "Status" dropdown, an "Action" dropdown with a "Wait" field in days, an "Activity" dropdown, and a "Resp Atty" dropdown. There are checkboxes for "Complete Actions" and "Respect Completion Automation". At the bottom, there is an "Import File" field with a "Select File" button, a "Process" button with a green checkmark, and a "Current Process" field showing "0%". A "File Import" sidebar is on the left, and an "F4] Close" button is at the bottom left.

- MediaTechGuy Software provides on-demand, batch scrubbing of debtors for active military, bankruptcy, and deceased status. You can run searches securely on your own computers, without sending files out-of-house.
- The MTG interface will export accounts to be scrubbed to a CSV file format from CollectMax™ in the required file format to be read by MTG. Selection criteria include Client, Status, Type, Balance Range, Open Date Range, Account Number Range, Action, and Last Payment Date Range. Exclusions include Do Not Contact, Bankruptcy, Defending Attorney, Accounts with Judgments, and/or Accounts without Judgments.
- The interface will import the results provided by MTG. For each search, you can change the status, add an action, complete an action, add an activity code to be communicated to various attorney networks, and change the responsible party on an account. You can also opt to update any debtors with the same SSN on other accounts in CollectMax™.
- PDF images obtained from MTG can be imported as a batch if you have the Document Management module installed.
- The MTG Search Interface requires an annual support contract as well as CollectMax™ Version 8. For more information, contact JST Sales.
